SUMMARY

Aspiring Software Engineer and AI Engineer with hands-on experience building scalable web applications and AI-powered solutions using Python, FastAPI, Django, LangChain, LangGraph, and SQL. Skilled in developing Agentic AI systems, Retrieval-Augmented Generation (RAG) applications, LLM-based solutions, API development, database management, authentication, and tool integration. Experienced in building intelligent applications with document retrieval, web search, memory, and real-time AI capabilities. Passionate about designing efficient, user-focused software solutions and applying emerging AI technologies to solve real-world problems.

EDUCATION

B.Tech in Information Technology
Chaudhary Charan Singh University

2023 – 2027 (Present)
Meerut, India

TECHNICAL SKILLS

Programming Languages : Python, SQL, Java, C++ , C

Database : DBMS, Data Modeling, Query Writing, MySQL

Data Analytics : Excel, Power BI, Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA, Data Visualization

AI & Machine Learning : Machine Learning, Large Language Models (LLMs), Transformers, Prompt Engineering, Retrieval-Augmented Generation (RAG) , Agentic AI

Frameworks & Tools : Django, Git, GitHub, VS Code, Jupyter Notebook, Cloude

EXPERIENCE

Company – UdyamKart
Remote, India

Feb 2026 – June 2026

- Cleaned and preprocessed large datasets using Python (Pandas, NumPy) and SQL to ensure data accuracy and consistency.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and business insights.
- Developed interactive dashboards using Power BI and Excel to support data-driven decision-making.
- Worked on real-world business data to analyze customer behavior and improve reporting efficiency.
- Collaborated with team members to automate data workflows and improve data processing time.

PROJECTS

AiByAI – Agentic AI Chatbot [\(Live Demo\)](#) [\(GitHub\)](#)

- Built and deployed an **Agentic AI chatbot** using Python, FastAPI, LangGraph, LangChain, and LLMs with real-time streaming responses.
- Implemented **Retrieval-Augmented Generation (RAG)** using ChromaDB and local embeddings to process uploaded PDF, DOCX, TXT, Markdown, Python, and CSV files and provide context-aware answers.
- Developed an intelligent **tool-calling system** with web search, document retrieval, long-term memory, calculator, weather, and real-time stock data, enabling the agent to dynamically select tools based on user queries.
- Implemented **JWT authentication, password hashing, user-specific conversations, chat history, and admin functionality** using FastAPI, SQLite, SQLAlchemy, and bcrypt.

TaskFlow – Django Todo Web Application [\(Live Demo\)](#) [\(GitHub\)](#)

- Built and deployed a full-stack Todo web application using **Django, SQLite, HTML, CSS, and Render**.
- Implemented **user authentication** with registration, login, logout, and protected user-specific task management.
- Developed complete **CRUD functionality** for creating, updating, deleting, and tracking tasks through a responsive web interface.

CERTIFICATIONS

- Power BI Specialist Certification
- SQL Certification
- SIH Certification
